

Project Charter

Project Title:

Toooout

Project Purpose and Justification

The purpose of this project is to develop a web application designed to enhance train station management and passenger experience. The app aims to streamline processes such as train scheduling, real-time updates, ticket booking, and station administration, fostering convenience and operational efficiency.

Business Case:

- Address the increasing demand for efficient and user-friendly train station services.
- Improve passenger satisfaction with real-time information and seamless ticketing.
- Optimize train station management processes, reducing delays and errors.

Objectives

- Develop a user-friendly web application accessible on both desktop and mobile devices.
- Provide core functionalities for train scheduling, ticketing, and live updates.
- Launch the app within the agreed timeframe with robust performance and security.

Stakeholders

- Project Manager:
 - mohamed salah ahmed
 - mahmoud said khamees
 - fares hussein farouk
 - gamal abdelnaser ali
- Project Team: software engineer , it team , tech leader , tester , website frontend devloper , backend team , designer , designer (freelancer)
- Third Parties: Payment gateway providers, train database API providers.

Timeline

Total Duration: 174.2 Days
